## Toddler Area

### A spot just for babies and toddlers

Tucked away from the regular traffic of the big kids is a perfect spot for parents to spend some time with the little ones. This area features books, toys for early childhood development, a comfy couch and toys that are just their level. New Moms can also use this space to put babies to sleep or nurse.

Newborns, babies, infants and toddlers can all enjoy the books in our bookshelf, and the various seats and holders in this cozy nook.
